

This instructional brief illustrates basic hardware and assembly for surface mounted marketing frame installation and artwork installation. Any technical questions regarding the surface mounted marketing frames should be directed to: **DigiCo Imaging at (614) 239-5200**

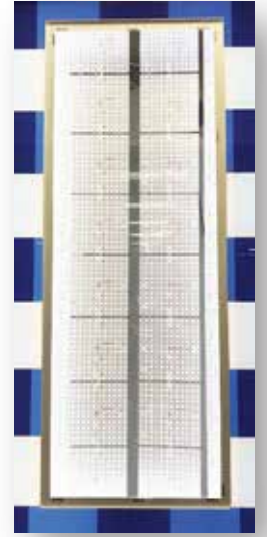

The various pieces of the surface mounted marketing frame will ship together. Each set will include: one base frame, one top cover piece, 14 magnets, and one suction cup for easy artwork swaps later. **Remove pieces from crate CAREFULLY. Frames are thin and prone to bending! Do not store frame pieces in upright positions as this could cause them to bend. If a kink occurs the frame cannot be fixed and a new frame must be ordered.**

This instructional brief illustrates basic hardware and assembly for surface mounted marketing frame installation and artwork installation. Any technical questions regarding the surface mounted marketing frames should be directed to: **DigiCo Imaging at (614) 239-5200**

Begin installation by lining up the base frame with the opening in the Gingham diffuser. The magnetic hinge should be at the TOP of the frame. The base metal frame ships with VHB tape to adhere to the glass.

** VHB (Very Heavy Bond) Tape is permanent! Align carefully before adhering frame to glass!*

**Silicone to be applied to perimeter of mounted frame by GC.*

Align the bottom corners of the top cover with the bottom of the base frame and push in until secure. Peel the protective covering off of the clear acrylic. Installation is complete.

**Artwork will arrive at a later date and be installed by store associates.*
